PD report is done
look for video of student lecture

1 tasks to do before wednesday

Each person must create a branch of the repo, i.e. leo-learning. write some code in the learning branch and push it into the repo
The branch code should have to do with some basics for visual analysis. i.e. take a video and turn it to grayscale.
The branch code must be similar to the style guide. if people have issues with it let us know.

2 john

video will be a little easier. try and find a video. lets get started with it
get some of the basic functions down.
get the first steps down.
map out the tasks more clearly.
make psudo code think about all the components that go into these things.

3 jinghan

email tuschur for lecture

4 naiqi

5 josh

each create a branch of your own and push it to the repo.
for wednesday talk about audo tools and video tools
we are going to talk about how to we are gonna work on the project. and psudo code.
