2	tasks	2

1 fix the spaces

Naiqi is going to push

1.1 jinghan

studied things. she wrapped the file name in a string which is good.
we are learning git things. rebasing
there is a difference between local stuff and remote stuff
the cha is the same in main and origin/main
what happens with pull before cleaning.
we have a conflict. we need to commit the changes or stashing them
revert this file to the head file
stashing is interesting

1.2 josh

doing audio analysis
using googles speech recognizer and sphinx
we will take the audio file and run it through the a word count

1.3 we learned arguments

json load file. seems interesting i will investigate later

2 tasks

figure something out for analysing faces.
fix path issues
naiqi and jinghan will learn opencv
