

Classroom Analytica: Progress Summary

Raja Moreno
teuscher.:Lab
August 3, 2018

Brief Overview of Project

- Automate the analysis of classroom activity
- Use both video and audio
- Show proof of concept for various concepts:
 - Individual and aggregate movement, temporal activity categorization by video and audio, parallelization of slow steps

Labeling the Professor

Individual Movement

Quantifying Aggregate Movement

Class 3 - Aggregate Movement (Students)

Activity Categorization by Video

HUMAN

COMPUTER

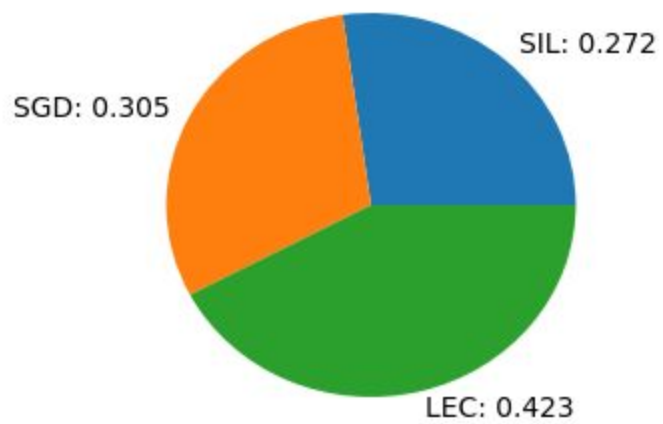

HUMAN

COMPUTER

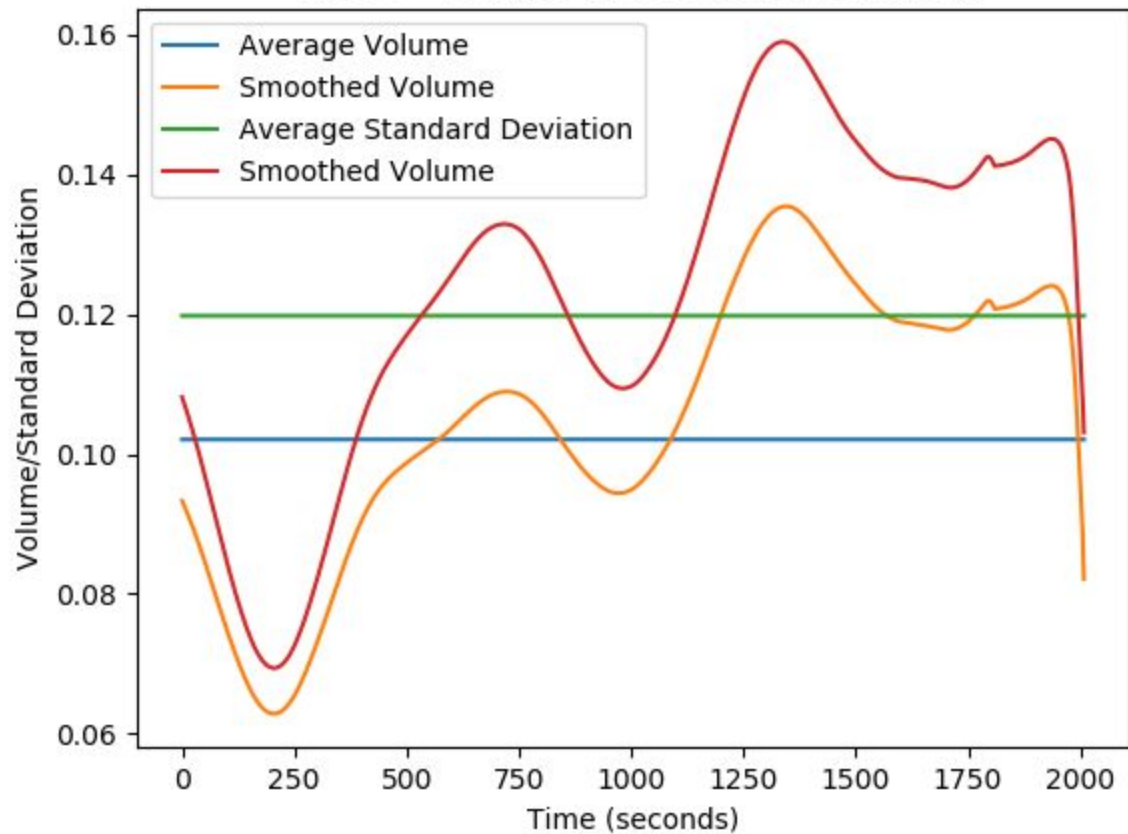

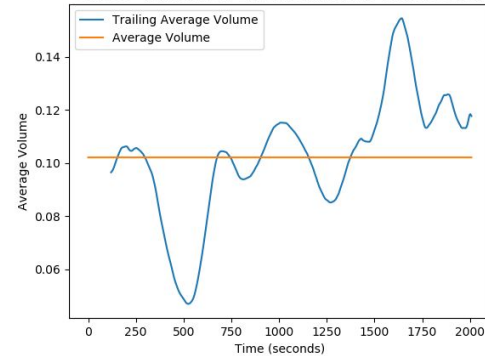

Analyzing Audio Data

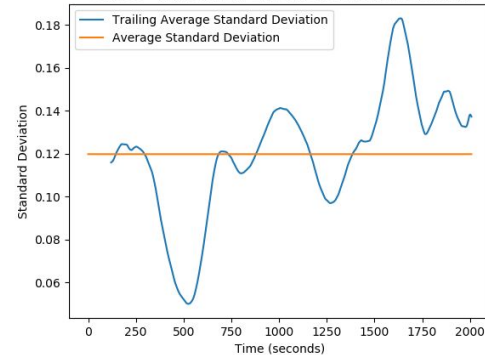

Class 3 - Volume and Standard Deviation

Class 3 - Aggressively Smoothed Average Volume Graph

Class 3 - Aggressively Smoothed Standard Deviation

Class 3 - Audio Classification of Activity

Activity Profile of Class 3

Class 3 - Audio Classification of Activity

Machine-generated

Activity Profile of Class 3

Human-generated

Parallelization

End of Parallelized Face Recognition
